

Children and education

The schools in the municipality of Malung-Sälen have, in recent years, been in the fifty best in the country in the Parents' Alliance comprehensive school index. The poll is from the parents' point of view.

Pre-school

The municipality has 16 pre-schools. Pre-school activities are directed at children in the 1–5 year age group with parents who work, study, are on parental leave with younger children or are looking for work. Applications for a pre-school place should be sent in at the latest four months before the desired placement date, and preferably earlier.

Comprehensive school

There are eight comprehensive schools to choose from in the municipality of Malung-Sälen, distributed around the municipality. We have no free schools. Comprehensive schools range from pre-school classes for 6 year olds to Year 9 at senior level. Two of the schools offer special schools. At the Central School in Malung there are preparatory classes 6–9 for pupils who have recently arrived in Sweden.

Upper Secondary School

The Malung-Sälen Upper Secondary School is in Malung. The school can offer the national programme for those who will begin a working career directly from school, for example, the building and construction programme, the electricity and energy programme, the hotel and tourism programme and the commercial and administration programme.

The school also offers the national university preparation programme in economics, natural sciences, social sciences, technology and aesthetics.

For pupils who want to venture on an international career at elite level in skiing (alpine) or snowboarding, there is the State Sports School. Elite drive is combined with studies in a university preparation programme. A large number of world class names in these sports are associated with the State Sports School in Malung.

The schools in the Malung-Sälen municipality have a wide range of brilliant results by various measurements. An investigation, for example, by Swedish Municipalities and County Councils (SKL) shows that nearly nine out of ten pupils in Malung complete their education within four years. This puts the municipality amongst the five best of all the country's upper secondary schools.

Adult education

Municipal adult education is aimed primarily at those who lack a complete comprehensive school education or upper secondary school skills wholly or in part or who have a need for further study. The Malung-Sälen Learning Centre offers a broad choice of courses both at comprehensive and at upper secondary level. The Malung-Sälen Learning Centre also offers occupational and apprentice training.
